

Inevitably, water and particulate accumulate in a locomotive's fuel tank. This water causes inefficient engine performance and increased wear and tear on the locomotive.

As a solution, PDI created the Diesel Dehydrator

The Diesel Dehydrator

Removes 99.5% of water from fuel

Extended-life filter removes particulate from fuel

Increased fuel injector lifespan

Increased fuel performance

Prevents algae bloom

Products, Technology and Experience Focused on **You**.

PDI develops, produces, distributes and supports products for industrial fluid transference and treatment. Driven by an engineering-focused culture of quality and commitment to innovation, PDI's engineers work closely with customers to assess requirements, make product and design recommendations and deliver cost-effective solutions from the most routine to the most unique applications.
